EDUCATION

Loyola School Bistupur , Jamshedpur
Science Stream
Passed : 2024
Percentage : 90%

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar
Bachelor of Technology in Computer Science and Engineering – Data Science Specialisation (3rd year)
Expected Graduation: 2028
Current CGPA : 9.02

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Computer Organization & Architecture, High Performance Computing, Software Engineering, Big Data.

TECHNICAL SKILLS

- Languages: C, Java, Python, Scala, SQL
- Core CS: Data Structures, Algorithms, OOP, DBMS, Computer Networks, Computer Architecture
- Tools: Git, GitHub, Oracle SQL/PLSQL, SolidWorks, Cura, Google Forms

KEY PROJECTS

Data-Driven Defect Prediction Model for Hot Rolled Coils
Tech Stack: Python, Pandas, Data Analysis

June2026 – July 2026
Tata Prashikshan Internship
Tata Steel

- Worked on a data-driven approach for predicting defects in hot rolled coils produced through the Thin Slab Casting and Rolling (TSCR) process.
- Used Python and Pandas to load, combine and preprocess production datasets containing process parameters such as casting speed and coil-related measurements.
- Analysed production data to identify relationships between process parameters and quality/defect outcomes.

ADDITIONAL ACADEMIC EXPERIENCE

- Worked with Oracle SQL and PL/SQL, including relational tables, primary/foreign keys, constraints and procedural database programs.
- Studied and implemented algorithms including sorting, graph algorithms, recursion, Huffman coding and shortest-path algorithms.
- Developed academic programs and exercises using Java, C, Python and Scala, with emphasis on programming fundamentals and problem solving.
